

SARABJEET SINGH

Software Engineer | Backend & Full-Stack Development | Cloud Solutions
+91-9353757849 | sarabjeet.9353@gmail.com | LinkedIn | GitHub | Portfolio

Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2+ years of experience building scalable, high-performance backend and cloud applications. Currently working as a Backend Engineer at Kronosx AI, developing services with FastAPI and Gin (Golang), and deploying via Docker and Kubernetes on AWS with Jenkins-based CI/CD. Prior experience architecting end-to-end full-stack solutions, migrating complex cloud systems, and integrating AI-powered features. Strong problem-solver with expertise in modern backend technologies, DevOps automation, and agile development practices.

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Go (Golang), HTML5, CSS3, SQL

Backend: FastAPI, Gin (Golang), Node.js, Express.js, RESTful APIs, WebSocket, Microservices Architecture

Frontend: React.js, Next.js, Redux, React Query, Tailwind CSS, Material-UI, Responsive Design

Databases: MongoDB, PostgreSQL, MySQL, Redis, Azure Cosmos DB

Cloud & DevOps: AWS, Azure (Blob Storage, Queue, Table, Functions), Docker, Kubernetes, Jenkins, CI/CD, GitHub Actions

Tools & Frameworks: Git, Linux, CLI Development, Azure SDK, Postman

Specializations: Backend System Design, Cloud Migration, Performance Optimization, AI Feature Integration, Chatbot Integration

PROFESSIONAL EXPERIENCE

Backend Engineer

June 2026 – Present

Kronosx AI, Bengaluru, Karnataka

- Working as a Backend Engineer building and maintaining backend services using FastAPI (Python) and Gin (Golang) for high-performance API development
- Containerizing and orchestrating services with Docker and Kubernetes, deployed on AWS infrastructure
- Building and maintaining CI/CD pipelines using Jenkins to streamline build, test, and deployment workflows
- Contributing to backend components that support AI-driven features, collaborating with the team on integrating AI/ML capabilities into product workflows
- Collaborating in an agile environment to design, build, and ship reliable backend infrastructure

Full-Stack Software Engineer

May 2024 – May 2026

Health Data Max Innovations, Bengaluru, Karnataka (2 years)

- Architected and developed full-stack web applications using React.js, FastAPI, and MongoDB, serving 10,000+ users with 99.9% uptime
- Led end-to-end AWS to Azure migration of critical infrastructure, reducing cloud costs by 30% while improving system reliability and performance
- Built and deployed scalable Azure cloud solutions utilizing Blob Storage, Queue Storage, Table Storage, and Azure Functions for automated workflows
- Integrated AI-powered chatbot using advanced NLP models, increasing user engagement by 45% and reducing support ticket volume by 35%
- Developed high-performance RESTful APIs with Node.js and Go, handling 500K+ daily requests with sub-100ms response times
- Implemented CI/CD pipelines using Docker and GitHub Actions, accelerating deployment cycles by 60% and reducing production bugs by 40%
- Optimized frontend performance using React Query, Redux, and code-splitting techniques, improving page load times by 50%

- Created custom CLI tools in Go for Azure storage management, automating routine tasks and saving 10+ developer hours weekly
- Collaborated in agile sprints with cross-functional teams to deliver features on time, maintaining 95% sprint completion rate
- Mentored junior developers on best practices in TypeScript, React patterns, and cloud architecture design

KEY PROJECTS

MoodMate - Mental Health Companion | *Flutter, Firebase | GitHub*

- Built full-stack mental health application with mood tracking and personalized recommendations
- Designed responsive UI with real-time mood analytics dashboard and journaling features

Full-Stack E-Commerce Platform | *React.js, Node.js, Express.js, MongoDB*

- Developed end-to-end e-commerce website with product catalog, shopping cart, and checkout functionality
- Implemented JWT-based user authentication and authorization system ensuring secure user sessions
- Built RESTful APIs for product management and designed MongoDB schema for efficient data operations

YouTube Clone | *React.js, Node.js, Tailwind CSS*

- Created full-scale replica of YouTube homepage with responsive design and component-based architecture
- Implemented CSS transitions, animations, and interactive features to replicate dynamic user experience
- Utilized React hooks and state management for seamless video browsing and search functionality

EDUCATION

Bachelor of Engineering in Computer Science

December 2020 – May 2024

Sri Venkateshwara College of Engineering, Bengaluru

Relevant Coursework: Data Structures, Algorithms, Database Systems, Cloud Computing, Software Engineering

ADDITIONAL INFORMATION

Certifications: Azure Fundamentals

Languages: English (Professional), Hindi (Native)

Interests: Open-source contribution, Linux system administration, dotfiles customization, performance optimization
